

# GREENHOUSES

# STANDARD BUILDING INFORMATION

- All structural members are made of 2.5" x 2.5"  
14-gauge galvanized tubing
- Double-Walled polycarbonate panels used for  
siding and roofing material
- Legs and rafters are spaced 4' on center
- 2' x 3' single pane window in door
- (1) 16" wide shelf runs the length of units
- 12" x 12" fan with thermostat
- Standard greenhouse comes with no floor.  
They are built on skids that are removed once  
building is delivered & set.
